To whom it may concern:

I would like to thank you for the scholarship that has been presented to me. I appreciate it and also all the confidence that you have in me.

While going to Sul Ross I am working so that I may receive my degree in Agricultural Education, so that I may also teach more students of the great things that can come from agriculture when enough time and effort is applied. This scholarship will help me to achieve this goal, and with more ease. Words really cannot express how much this means to me, and the only way I can see to show you is by graduating.

Thank you again for what you have done for me, I know that I will not let you down.

Thank you again,

Amie Haass
